

MADUSHAN SAMAYASIVAM

DevOps Engineer · Frontend Development · Cloud Infrastructure

Badulla, Sri Lanka | Open to Remote & Relocation (EU) | madushansivam@gmail.com | github.com/madushansivam | linkedin.com/in/madushansivam | madushansivam.github.io/portfolio

PROFILE

Final-year HNDIT (Information Technology) student and self-taught engineer who ships. Built and deployed browser-native tools, games, and a containerized cloud API independently — including a perceptual-hashing image tool used in live NGO field operations. Currently building cloud infrastructure depth (Docker, AWS, Kubernetes) on top of a strong frontend and systems foundation. Founder of a solo game studio. Comfortable owning a project end-to-end: design, build, ship, iterate.

TECHNICAL SKILLS

DevOps & Cloud: Docker, AWS (EC2, CLI), CI/CD (GitHub Actions), Linux (Fedora/Ubuntu), Git, Terraform & Kubernetes (learning)

Frontend: JavaScript, HTML5/CSS3, React, Three.js, Canvas API, GSAP

Backend & Data: Node.js, PHP/Laravel, MySQL, Python

Design: Figma, UI/UX Design, Responsive Design

SELECTED PROJECTS

ImageSync — Browser-Native Image Similarity Engine

- Built a perceptual-hashing (DCT) tool that matches and batch-renames images entirely client-side — zero backend, zero server cost.
- Solved a real problem from KFHI NGO fieldwork: manual photo-matching that took hours now takes minutes. Used in live field operations.

ContainerDrop — Dockerized REST API on AWS

- Node.js REST API containerized with a multi-stage Alpine build (55MB image), HEALTHCHECK configured, pushed to DockerHub, deployed to EC2.
- First production infrastructure project — end-to-end from Dockerfile to a running cloud deployment.

Hēlapidi — Browser Multiplayer Shooter

- Solo-built 2D local-multiplayer shooter in vanilla JavaScript with Sri Lankan cultural identity, under own studio (Nānmīn Game Studio).
- Canvas-based rendering, delta-time physics, zero install — runs entirely in-browser.

The Quiet Protocol — Narrative Browser Game

- Built for APOGEE GameJam 2026 (BITS Pilani × Postman) in 48 hours; Web Audio API ambience and a 12-turn branching narrative in a single HTML file.

LEADERSHIP & FIELDWORK

Technical Lead

2025 – Present

- Lead a 30+ member student community spanning software engineering, cybersecurity, and UI/UX; manage GitHub org structure across 5 teams.

Field Data Enumerator

- Collected structured survey data across 25+ GN Divisions in Badulla District using KoBoToolbox.

EDUCATION

Higher National Diploma in Information Technology (HNDIT)

2023 – 2026 (Expected)

Sri Lanka Institute of Advanced Technological Education (SLIATE), Badulla

G.C.E. Advanced Level — Engineering Technology Stream

2022

G.C.E. Ordinary Level

2019

CERTIFICATIONS

- AWS Certified Cloud Practitioner (CLF-C02) — In Progress
